Re: Completion of On-Site Work under Order No.V-W-10-C-937, for the Elgin Salvage and Supply Site, 20 Jefferson Yard, Elgin, Illinois

Dear Mr. Bielawski:

The United States Environmental Protection Agency (U.S. EPA) issued an Administrative Order on Consent (AOC) on October 14, 2009, to the above identified Potentially Responsible Parties, collectively known the Respondents, requiring them to perform specified removal activities at the Elgin Salvage and Supply Site, 20 Jefferson Yard in Elgin, Illinois. The Order required that Respondents conduct a time critical removal action to remove hazardous soil described herein to abate an imminent and substantial endangerment to the public health, welfare or the environment that was presented by the actual or threatened release of hazardous wastes and/or substances at or from the Site. The specific removal activities that were required by the Order and completed by the Respondents are detailed below.

Based on my oversight of the Respondents' activities at the Site, my review of the final report and a final inspection of the site, I conclude that the Respondents have completed the following work required by the Order:

1. The Respondents prepared and implemented an approved Work Plan that included tasks and time lines for completion of all work activities required by this Order, a Site-specific Quality Assurance Project Plan ("QAPP"), as well as a Site Health and Safety Plan ("HASP");
2. The Respondents characterized, removed and properly treated and disposed of hazardous soils found on-site all in accordance with EPA's Off-Site Rule (40 CFR 300.440); and

3. The Respondents ensured that the cleanup, as defined in the approved Work Plan and amendments to the Work Plan, adequately protected human health, welfare, and the environment from hazardous waste and/or substances.

This notice of completion in no way releases the Respondents from any potential future obligations to perform additional work to address the same or other conditions at the Site. Similarly, this notice of completion does not release the Respondents from any record keeping, payment, penalties for any violation of the Order, or other obligations that extend beyond the date of this notice.

Please contact me at 312-353-9351 or Tom Turner, Office of Regional Counsel, at (312) 886-6613 if you have any questions or comments about this letter.

Sincerely,

Steve Faryan  
U.S. EPA  
On-Scene Coordinator
